

NODE.JS DEVELOPER

Working Location: Danang/Hue/Remote

Position Type: Full-time

JOB SUMMARY:

We are looking for a Node.js Developer responsible for managing the interchange of data between the server and the users. Your primary focus will be the development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the application. Therefore, a basic understanding of front-end technologies is necessary as well.

QUALIFICATIONS:

- BSc degree in Computer Science, Information Technology or relevant field
- 2+ years of experience working as a Node.js developer
- Strong proficiency with JavaScript
- Knowledge of Node.js and frameworks such as Express, StrongLoop, Koa, Nest, etc.
- Experience with relationship databases and non-relationship databases (mysql, postgresql, mongoDB, dynamoDB, etc)
- Good understanding of server-side templating languages and server-side CSS preprocessors
- User authentication and authorization between multiple systems, servers, and environments
- Experience with serverless architecture
- Implementing automated testing platforms and unit tests
- Good communication skill in English
- Experience with Google Cloud platform and AWS services a big plus
